NPIC/R-301/64

PREFACE

This report is one in a series on Soviet Ground Force and logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

NPIC/R-301/64

SUMMARY

25X1D

25X1D

These two rail-served installations are located on the southern edge of Borisov (54-15N 28-30E). The POL storage area is immediately north of the supply depot (Figure 1). Both areas are on the north side of the Moscow-Minsk rail line. The Borisov-Minsk highway is about 1.5 kilometers (km) northwest of the two areas. Several all-weather roads serve the areas. Borisov Army Barracks and Maneuver Area West (AL-1, TA-1) is 2.9 km northwest of the POL storage area and 3.6 km northwest of the supply depot. Good all-weather roads connect both installations to the above military installations.

The POL storage area, which is secured, covers approximately 15 acres and includes one administration building, two storage buildings, and 20 vertical POL storage tanks (Figures 2 and 3). The supply depot covers approximately 85 acres and includes 50 storage buildings.

These installations were covered by [] photography and [] mis-
sions between [] 25X1
The same level of track activity was observed 25X1D
between [] with 25X1D
reduced track activity during the winter months. Significant changes since [] in the POL storage 25X1D
area include the addition of one storage building and 13 vertical POL storage tanks, and extension of the area to the south. The area on the eastern side, formerly a part of the POL storage area which contained three storage buildings and a repair shop, has been converted to industrial usage. Two administration buildings evident in 25X1D
the POL storage area in [] are not observed on later [] missions. Changes in the 25X1
supply depot include construction of 17 storage buildings scattered throughout the area and a new secured area containing three storage buildings.

DESCRIPTION OF INSTALLATION

25X1D

Railroad Service

Two spurs from the double-track Moscow-Minsk rail line serve the supply depot and one spur serves the POL storage area. Small scale photography precludes identification of track-side and rail-end docks.

E2	7	All seven of these storage buildings constructed between []	25X1D
E3	5	One new building was constructed in this secured area between []	25X1D
E4	3	This secured area and all three buildings were constructed between []	25X1D
		Track activity throughout the areas indicates that all buildings are being used.	25X1D

Road Service

Both installations are served by two all-weather roads connecting with the Borisov-Minsk Highway 1.5 km to the northwest. Several other roads serve the installations.

POL Storage Area

There are fifteen [] POL storage tanks 25X1
located in area G1--eight constructed between [] 25X1D
Area G2 contains three 35-foot and two 65-foot tanks--all constructed between [] 25X1D
The POL storage area also contains one administration building (D, Figure 3) and two storage buildings. Track activity indicates the area is occupied.

General Storage Area (Figure 3)

Area	Number of Buildings	Remarks
E1	35	Ten storage buildings constructed []
